EDUCATION

THE GEORGE WASHINGTON UNIVERSITY

B.S. Information Systems, GPA: 3.97, Dean's List, Bank of America Scholar

Washington, DC

December 2026

TECHNICAL SKILLS

Languages & Data: Python, JavaScript, SQL, PySpark, HTML/CSS

Backend & Web: Node.js, Express, React, REST APIs, SQLite, MySQL

AI / LLM Engineering: Anthropic Claude API (agentic tool use, structured outputs), OpenAI GPT API, API Integration, Prompt Engineering, LLM Output Evaluation

Platforms & Practices: Databricks, GitHub, Vercel, Jupyter Notebook, Tableau, Jira, Agile/Scrum, Requirements Gathering

Certifications: AWS Cloud Practitioner (in progress), Google Data Analytics (in progress)

EXPERIENCE

Handshake AI

Remote

AI Training & Evaluation Specialist (Contract)

[Month] 2025 -Present

- Evaluate and refine large language model outputs against detailed quality rubrics, strengthening response accuracy, reasoning, and instruction-following across complex task domains
- Author and stress-test prompts to surface model failure modes, producing structured feedback that informs training data quality

The George Washington University

Washington, DC

Business Systems Development Teaching Assistant

August 2025 -Present

- Guide 45+ students through systems analysis, requirements gathering, and process mapping, producing ERDs, DFDs, and data flow documentation aligned with industry standards
- Review and provide structured feedback on 60+ technical deliverables weekly, reinforcing analytical rigor and business logic accuracy

News Corp

Remote

AI Product Strategy Extern & Cohort Leader

May 2025 -August 2025

- Designed and executed a mixed-methods survey (1,000+ respondents) on Gen-Z news personalization, analyzing quantitative and qualitative results to identify engagement gaps in digital news products
- Developed three product recommendations for The Times grounded in survey findings and presented them directly to the VP of Engineering

PwC

Remote

Non-Profit Consulting Extern

January 2025 -March 2025

- Researched and evaluated 150+ institutional funding sources for a nonprofit client, narrowing to three recommendations representing up to \$1M in potential funding
- Built application roadmaps for each recommended funder and presented them to PwC consultants and client leadership, securing client adoption of the recommendations

TECHNICAL PROJECTS

ForgeLink: AI Sourcing Assistant for B2B Buyers

Claude API, Node.js, Express, SQLite

- Built an agentic sourcing assistant running a Claude tool-use loop over three custom tools (catalog search, supplier lookup, RFQ creation), grounding every price and lead-time comparison in retrieved data rather than model-generated listings
- Implemented bcrypt-hashed authentication with session cookies and persisted per-user conversation history in SQLite, trimming context on message boundaries so tool call and result pairs stay intact

Blue Ledger: AI Financial Document Processor

Claude API, Node.js, Express

- Built a web application that sends invoices, receipts, and bank statements to Claude as native document input with a schema-enforced JSON output, extracting issuer, dates, line items, and totals into structured data while flagging low-confidence fields rather than guessing

Olio: AI Shopping Assistant

React, Vite, Node.js, GPT API, SerpAPI

- Built and deployed a shopping assistant converting natural language requests into live product results with AI-written summaries; rebuilt the frontend as a component-based React application and fixed backend defects that prevented saved items and orders from persisting

Rideshare Pricing Analysis

PySpark, Databricks

- Processed and analyzed ~880,000 combined Uber/Lyft trip records in Databricks using PySpark, applying linear regression and statistical testing to model pricing drivers across ride types and conditions

LEADERSHIP & INVOLVEMENT

- **GWU Students In Technology Association, Co-Founder & President** (Jan 2025 to Present): Built a 150+ member organization from the ground up, establishing AWS, Deloitte, and NVIDIA partnerships to deliver technical career programming
- **ColorStack, Chapter Founder & President** (Jan 2026 to Present): Founded GWU's ColorStack chapter, connecting Black and Latinx computing students to technical recruiting pipelines at major firms
