EDUCATION

THE GEORGE WASHINGTON UNIVERSITY, School of Business **Washington, DC**
Bachelor of Science, Information Systems, GPA: 3.97, Dean's List *December 2026*
Relevant Coursework: Business Analytics, Statistics, Database Management, Business Systems Development, Python, Web Analytics

SKILLS

Technical: Python, SQL, R, JavaScript, React, PySpark, Databricks, Supabase, LLM integration, prompt engineering
Analytics & Tools: Tableau, Power BI, Advanced Excel, Figma, Jira, Agile/Scrum, A/B testing, user research, requirements documentation
Certifications: Deloitte Digital Salesforce Academy (2026)

EXPERIENCE

LAWROBO **Washington, DC**
AI Product Engineer *September 2026 - Present*
- Define and prioritize features for a live AI legal assistant by researching user needs and competing tools in the legal AI market, presenting recommendations to the founder in weekly product reviews.
- Write the requirements for approved features, then build them, taking each from spec through implementation and testing rather than handing off to a separate engineering team.
- Shipped 15+ features into production for a product already in active use by clients, as one of two technical leads on the build.

THE GEORGE WASHINGTON UNIVERSITY, School of Business **Washington, DC**
Teaching Assistant *August 2025 - Present*
- Lead weekly lab sections and 2-3 one-on-one sessions per week across two courses for 45+ students with varying technical backgrounds; 95% of students who attended one-on-ones earned an A.
- Grade 90+ technical deliverables weekly against a consistent rubric, writing individualized feedback on code and system design that students can act on before the following lab.

STUDENTS IN TECH ASSOCIATION (SITA), The George Washington University **Washington, DC**
Co-Founder & President *January 2025 - Present*
- Co-founded GW's first Information Systems student organization to fill a gap in technical career programming; scaled to 150+ members in one semester and raised $3,000+ to fund programming.
- Secured and managed partnerships with AWS, Deloitte, and NVIDIA to deliver 7+ technical and career development events.
- Led an AWS-sponsored sustainability hackathon in collaboration with 5 of GW's largest technology organizations, drawing 60+ participants across 10 teams.

Olio: AI Shopping Assistant **Washington, DC**
Lead Project Manager and Developer *January 2026 - Present*
- Designed and shipped an AI shopping assistant to test whether natural language could replace keyword product search, building a React front end, GPT prompt layer, SerpAPI integration, and Supabase backend deployed on Vercel.
- Ran user testing with a 10-person group and iterated on the interaction model, cutting average search time by 50%.

Ride-Share Pricing Analysis **Washington, DC**
Project Lead *January 2026 - May 2026*
- Merged and validated two raw datasets into a 637,976-trip analysis set in Databricks using PySpark and SQL, removing roughly 15% of records for data quality issues.
- Built a regression isolating surge pricing as the dominant fare driver at roughly $22 per unit increase, and found Uber and Lyft statistically indistinguishable on price per mile ($p = 0.807$), reframing Lyft's opportunity as operational rather than pricing.

NEWS CORP **Washington, DC**
AI Product Strategy Extern & Cohort Leader *May 2025 - August 2025*
- Ran a mixed-methods study on why Gen-Z users were disengaging from AI personalization features, surveying 200+ respondents and analyzing scored and open-ended responses in Excel and AI tools.
- Traced three lagging KPIs (trust, engagement, and adoption) to privacy concerns and perceived filter bubbles, then built four Figma-prototyped product recommendations with a phased launch roadmap and A/B testing plan.
- Selected from a 50-extern cohort to present to the VP of Engineering, who credited the work with addressing every issue raised; led cohort coordination to 100% on-time completion.

PRICEWATERHOUSECOOPERS (PwC) **Washington, DC**
Non-Profit Consulting Extern *January 2025 - March 2025*
- Built an Excel scoring framework ranking institutional funders on fit, likelihood of award, timing, and renewability for a New York nonprofit shifting from an aging individual donor base toward stable institutional funding.
- Researched and scored 50+ funders against the framework, recommended four representing over $1M in potential funding, and presented to PwC leadership and the client, who applied to all four.
